Carolina Kitchens**

CAROLINA KITCHENS  
of CHARLESTON

“Since 1984, Carolina Kitchens has provided custom cabinetry and kitchen design to the Lowcountry. Whether it is new construction or a remodeling situation, we strive to give our clients the highest level of quality and function for the best value. Our relationships with established and reputable builders like Citadel Enterprises allow us to give our clients a turnkey remodeling project while providing them the best possible customer service possible.”

Winter 2007

*Beyond Expectations*

**Streamline your Renovation with Design/Build**

What does your dream kitchen look like? Does it boast granite counter tops? Perhaps it houses a stainless steel refrigerator? If you're ready to renovate a room in your house, you should consider finding a remodeling company that provides a design/build service.

There is one simple answer to the question of why design/build — single source service. When you utilize a design/build firm, you have an architect and a remodeler who fully understand your vision, your lifestyle, your design preferences, your priorities and most importantly your budget. What would be worse than working with an architect who plans a room that doesn't fit your budget? Now, you have to go back to the drawing board (literally) and spend more time and more money on the design of the space.

Design/build is one of the many services Citadel Enterprises offers its clients. Our AIA architect and experienced project estimator will work with you from concept to establishing a budget, from design to completion. We take your budget seriously and try to never over-design. With Citadel Enterprises, you will have access to a group of professionals who will create the space of your dreams on budget, on time and to your satisfaction. This commitment to understanding and managing your expectations will also overlap into our award winning and industry leading construction process.

If you're ready for the kitchen of your dreams or want to renovate your entire home, then consider Citadel Enterprises and its design/build division. Learn more about us at [citadelenterprises.com](http://citadelenterprises.com) or call us at (843) 884-4303. We promise to go Beyond your Expectations.

**Project of the Quarter
